

Seasonal Updates

Daptiv gives customers seasonal updates so they always have access to the latest features and functionality.

Daptiv PPM Winter '09 extends the leading On-demand PPM solution to multiple languages, browsers and platforms, giving users more choices than ever to use the system in the ways they want.

Because Choice Is a Good Thing

With the launch of Daptiv PPM Winter '09, you now have the option of French, German & Spanish as well as English –

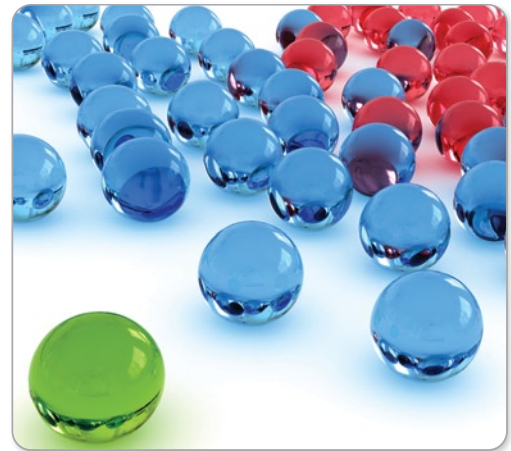

perfect for global teams, multi-national enterprise rollouts, and individuals with a different native language than their team members.

Daptiv PPM Winter '09 also adds new browser and platform alternatives for you. Daptiv PPM now supports FireFox 3.0 (Windows and Macintosh) in addition to

Internet Explorer, opening up another browser choice for individuals and enterprises.

Summary: Use Daptiv the way you want to get your work done.

More for Managers

We introduced the very first online Gantt Chart in 2002. Now... Daptiv PPM's next generation beta Gantt Chart is packed with enhancements to make it easier for you to manage tasks and projects:

- It's faster, has more filters, and lets you add more tasks
- It zooms to fit the portion of the schedule you want to see, lets you create multiple dependency types by clicking-and-dragging, highlights changes versus a baseline and more
- It saves you time by letting you create your project schedules directly in a browser without using external project tools

Plus, managers now can request (and approve) individual resources in Team Manager.

Beta Gantt Chart

More for Administrators

- Changes to Billing Rates history will improve accuracy of historical calculations and reporting
- Updates to the ProjectTransit client improve the usability for integrating with Microsoft Project
- Daptiv Outlook Integration now auto-updates when a new client is available – no more manual upgrades needed

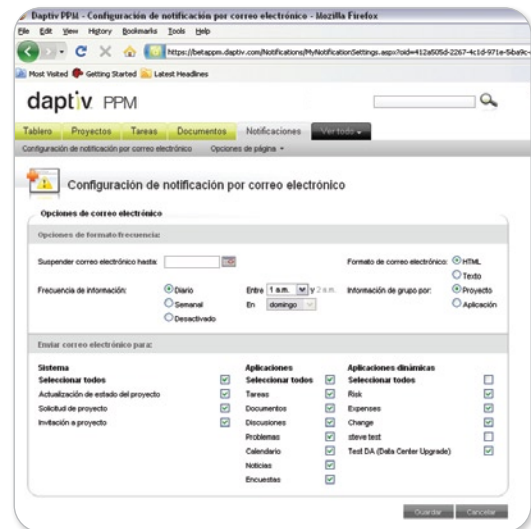

More for Team Members

Daptiv PPM Winter '09 gives you the ability to control when and how you receive email notifications, including:

- Consolidated “digest” notifications that can be sent to you weekly or daily during a specified time period, and grouped by project or application
- Suspending notifications (e.g. for vacations, out-of-office, etc.)
- Changing notification format between HTML and text
- Subscribing to notifications by Daptiv PPM application, or by individual Dynamic Application
- Updating all of your notification settings from a single location

Plus, Daptiv PPM Winter '09 introduces a new Help system to give you better, easier access to help topics and an improved Help search engine for getting your answers faster.
